WHY HIMs

Lorem ipsum dolor sit amet, quot scriptorem consectetur duo ad. Et choro insolens volutpat vis, in has liber qualisque.

Paulo mediocritatem est no. Veri dissentias duo ei, ei vis dissentias conclusionemque, omnes debitis qui ut. Et choro insolens volutpat vis, in has liber qualisque.

HOW IT WORKS

1. Manages all client data from admission to discharge
2. Makes Life Easier to track patient's need and comfort
3. Keeps Patient's overall financial record safe and organised
4. Laboratory tests of Patients will also be found in one place
5. Tracks Doctor's information for every patient
6. Customer's medicine and prescription data can also be added to the system

2

PATIENT REGISTRATION

- Register account by filling out form on the website/following invitation from administrator
- Medical record number (MRN) should be created by the system and assigned to the patient. Patients can be found using MRN by any employees of the Hospital
- NID (National ID) information is mandatory while registering as patient, this can be used as secondary filter to find patient
- After registering, patient can view/edit their own information other than MRN
- Patients can view/print their own medical record/lab results. Doctor's note for lab result will not be visible to patient
- Patients can view/print their own billing record (both due and paid invoices)
- Patients can schedule or reschedule doctor's appointment by selecting doctor group/symptom/doctor name/date/time
- Should have option to add photo

1

LAB/PATHOLOGY

- Register account by filling out form following invitation from administrator
- Create new test and assign patient, print label with bar-code for the test
- Upload lab test document and input test result
- View/edit lab request
- View/edit lab test result before a doctor provides note, once doctor writes note, lab asst. won't have access to modify
- When lab test is created, it will create billing and assign patient so it becomes visible to anyone who search and view the patient information on the system
- When lab test is assigned to a patient, billing will be assigned to both patient account and IPD

4

E-PRESCRIPTION MODULE

- Patient name & ID number
- Doctor suggested medicine names
- Doctor suggested lab test names
- Current patient physical status
- Diseases analysis notes
- Treatment type
- Doctors suggestion
- Patient can print the soft copy

OPERATION THEATER (OT)

- Scheduling/booking of OT room
- Assigning to a doctor
- Detailed preoperative assessment report
- Multilingual consent form
- Inventory and stock management
- Custom report

6

INVENTORY MODULE

- Complete inventory workflow
- Sub/central stores drug requisitions & central stores indents
- Purchase order- GRNs & inspection
- Issues by central store and receive by sub stores
- Purchase rejection and sales return
- Stock adjustment
- Auto synchronization of data between central & sub stores
- Automatic monitoring and alert on expiring drugs
- Drug dispensing and billing
- Inter stores transfer of drugs
- Custom MIS Report
- Inventory module for OT, drug and other materials

8

Queue Management Module

OUTDOOR PATIENT UNIT (OPD)

- Patient account create/view/edit
- Appointment create/assign/view/schedule
- OPD cash collection
- OPD patient pathology registration
- Out patient pathology invoice generation

3

INDOOR PATIENT UNIT (IPD)

- Patient account create/view/edit
- Ward/room/bed management
- Patient's medicine
- Patient's diagnosis report
- Patient prescribe test (investigation)
- Patient history & findings
- Patients record review
- Discharge draft
- Treatment management
- Nurse management

5

Ward Management Module

TREATMENT MANAGEMENT

- Patient information
- Patient treatment history
- Treatment type/priority/suggestion
- Medicine suggestion notes
- Suggestion for nurse
- Physical status
- OT recommendation/requirement
- Lab test/report- discharge date

4

Nurse Management Module

Blood Bank Management Module

7

ACCOUNTS

- Pathology/lab accounts
- Drug inventory accounts
- Material inventory accounts
- Patient billing account
- Ambulance service accounts
- Part-time doctor honorarium accounts
- Blood bank accounts
- Custom MIS Reports

Ambulance Management Module

9

CERTIFICATE MODULE

- Patient discharge certificate
- Birth certificate
- Death certificate
