6. Comprehensive Report Suite

MARKETING

Handles all the order related activities that the merchandizers carry out to execute an order, starting from Customer Inquiries and Costing all the way to placing Orders with the Factories.

SAMPLE MOVEMENT

Tracks the complete life cycle of sample movement starting from placing a Sample Requisition with a Factory. It tells you:

If sample has been received from factory, If tech team has given feedback, If the sample is submitted on time, If the sample is approved or not.

Gives you the Factory's efficiency in terms of doing samples on time, number of reworks and many more ...

TIME & ACTION

Provides Critical Path for an Order and also "task to do" list for individuals. System emails any deviation from the Critical Path. Reminders for upcoming tasks and Alerts for overdue tasks are auto emailed. Complete task level monitoring for Orders, Departments and Individuals. This is integrated with all the modules and sits at the heart of the ERP ecosystem.

PRODUCTION PLANNING & MONITORING

Allocates resources among all the Factories for monitoring Daily Production. Tracks fabric and garment (including sweater) production in individual factory against given Customer Orders.

Gives detailed production information, starting from Fabric Inspection all the way to Final Inspection. Inline Inspection results, along with AQL, are also kept in the System. Useful analytical Quality information like Top Defects by Factory can be easily derived from here.

The screenshot displays a software interface for production planning and monitoring. It features a top navigation bar with a logo and menu options. Below the navigation bar, there are several data tables and filters. The main table shows production details for various items, including columns for Item Code, Description, Quantity, and Status. There are also summary tables and a 'Subtotal Production Status' section at the bottom.

The screenshot shows a software interface for commercial activities. It includes a left-hand navigation menu with categories like Accounting, Sales, and Commission. The main area contains a form for entering data, including fields for Date Invoice, Invoice No., and Ship Date. Below the form is a table with columns for Invoice No., Description, Qty, Unit Price, and Amount. The table lists multiple invoices with their respective details.

COMMERCIAL

Handles all the functions of commercial activities like L/C management, Transfer L/C management, Packing Lists, Commission Invoicing, Commission Realization, etc.

CASH MANAGEMENT

Handles all the operational finances of a Buying House concern. Annual Expenditure Budget, Monthly Budget, Weekly Cash Requisition, Actual Expenditure recording etc. are all handled in a compact way.

REPORTS SUITE

A rich set of Reports are built in ranging from Operational Reports all the way to Historical and Analytical Management Reports. Reports can be configured to be auto-emailed to Users. Interactive Dashboards are also there for Team Leaders, Department Heads and Management. Furthermore, there is provision to open up certain reports to the Customers. A great opportunity to take your business to the next level. And finally, there is the Kandaree Mobile Extension that opens up lot of reports and features to your smart phones through Mobile Apps.
