# Complete & Native ecommerce app

Probably you are looking for a perfect mobile solution for your ecommerce business! And you don't want to build crappy junk like cross platform app, as you have a great sense of user experience. You may or may not have any existing ecommerce site, that's not a big deal boss! This is the tool for you by which you can build complete native android app for your ecommerce business.

## Based on WooCommerce

We build the app based on WooCommerce, most popular ecommerce plugin on the planet. You will be able to build native android app based on your existing WooCommerce site. Don't worry if you don't have existing WooCommerce site, it's a matter of few clicks to prepare dashboard for the app!

## Decent app Design

We maintained material design pattern to decorate UI. Also all basic component are nicely decorated with unique looking and gorgeous color combination.

## Optimized Code

We do highest care about code optimization. You will get a bunch of clean code. Customization/-modification will be pretty straightforward as everything is modular.

## Best performance

Build a lag free super app from your site! We optimized every single implementation for highest performance. Don't worry about app responsiveness and resource consumption.

## Build with Android Studio

This app is developed in Android Studio with Android Studio. Android Studio is the most popular and efficient android development platform on the planet.

## Push notification

This app supports push notification service. You can send notification to unlimited user or even a targeted user using the Google's firebase messaging service.

## Analytics

Analytics are important to monitor the revolution of your app and also your e-business. It gives you key insights and an idea about how people are using it

## Admob

Want to earn revenue by giving advertisement? Yes, we have added that in our app too. You will also be able to disable Ad for your app if you want.

## Support channel

Customer seller interactions are easy through this app as we have added call, sms and email feature. Also we built a new channel for customer communication through Facebook page/chatbot.

## Product description

---

If you are a WooCommerce admin and you are looking for a native Android app for your site then probably this is the best solution for you.

If you are planning to start ecommerce business and you don't have any mobile development knowledge, this is the solution you need. This is not mandatory to have an existing WooCommerce site. We will guide you to build your dashboard.

This app allows your create native android application. WooCommerce will be used as base backend. App includes all the features what a complete ecommerce app should have.
