Table 2: A list of our favorites and Major clients

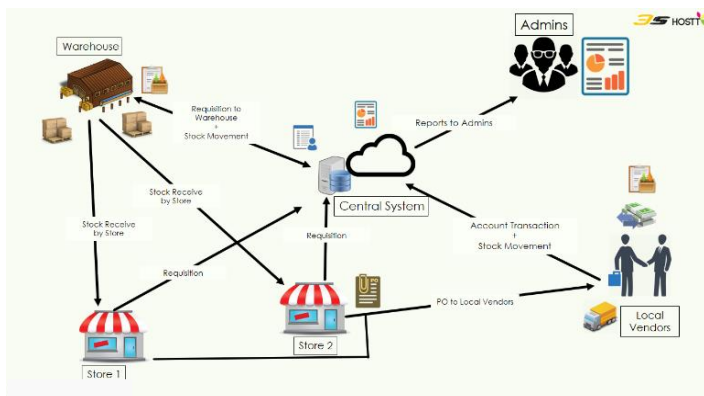

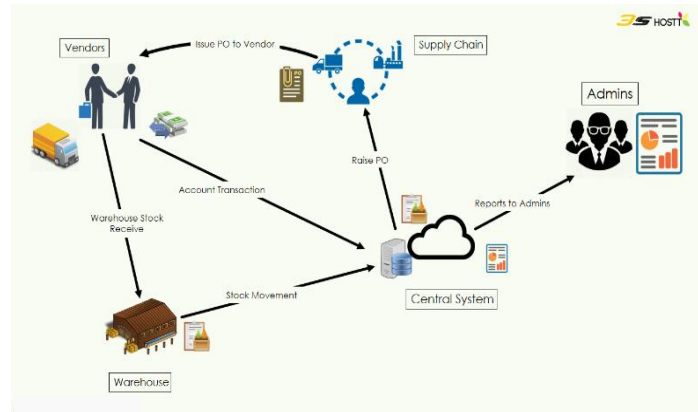

In-house Functions

From taking order to settling the bill can be executed in the software through the Terminal or Tablet and is seamlessly integrated with kitchen, inventory and accounts of the restaurant. Customizable user access level of the system and the online reporting and data storage facility enables remote monitoring of businesses for the management with greater control.

Back-office Functions- single outlet

Monitoring the real-time inventory status the management can issues system generated PO to vendors and receive goods through the system to avail system generated reports on stock consumption rate, costs and demand forecasts. The online reporting tool can be customized to generate management specific reports of the business.

Back-office Functions - Multiple Outlets

The Centralized solution enables management to manage multiple outlets under the same platform. From Tracking of stock from central ware house to individual outlets to having a cumulative to outlet wise report of every aspect makes it easier and faster to reconcile compare and manage the business.

Feedback from our clients

We spent a lot of money purchasing the software solution for our food industry from abroad but they stopped the drainage by developing a better and dependable solution for Bangladesh.

Murshad Elahi
Head of Operations
Navana Foods Limited

This is the most user friendly and effective ECR system I have seen in the country. I have never heard “No” from the creators, they are flexible and open to innovative ideas. Their prompt service and knowledgeable technical team has taken this industry to a different level.

Bappi Rahman
Chef & Managing Partner
The Pit Grill

When we started to look for software, all we came across was old conventional software with limited customization and then came 3S HOSTT, they had the drive to accept and deliver challenges which they did brilliantly

Ashfaq Rahman Asif
Managing Partner
Tarka
