Recruiting system is broken

1

BUSINESS STRUGGLE

82% of Fortune 500 companies don't believe they recruit highly talented people

IT'S HARD

For companies to find good people

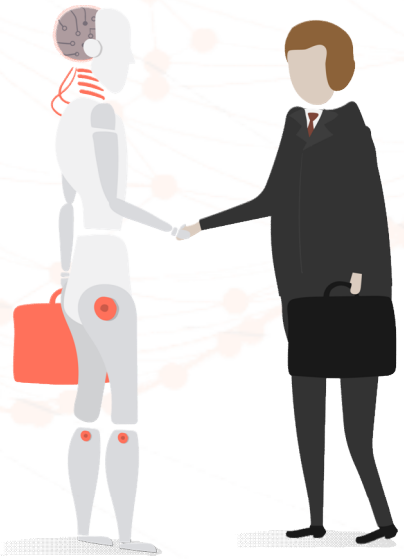
2

JOBSEEKERS ARE FRUSTRATED

Up to **25%** of new employees quit within the first 6 months on the job

IT'S HARD

For people to find the right company.



easy.jobs

can help to hire faster and right people with its **AI Technology**

Meet Dina.

She recently started her first startup company to solve women's safety at the road through an app.

Her startup was growing fast but feared she didn't have experience in hiring people to expand her team.

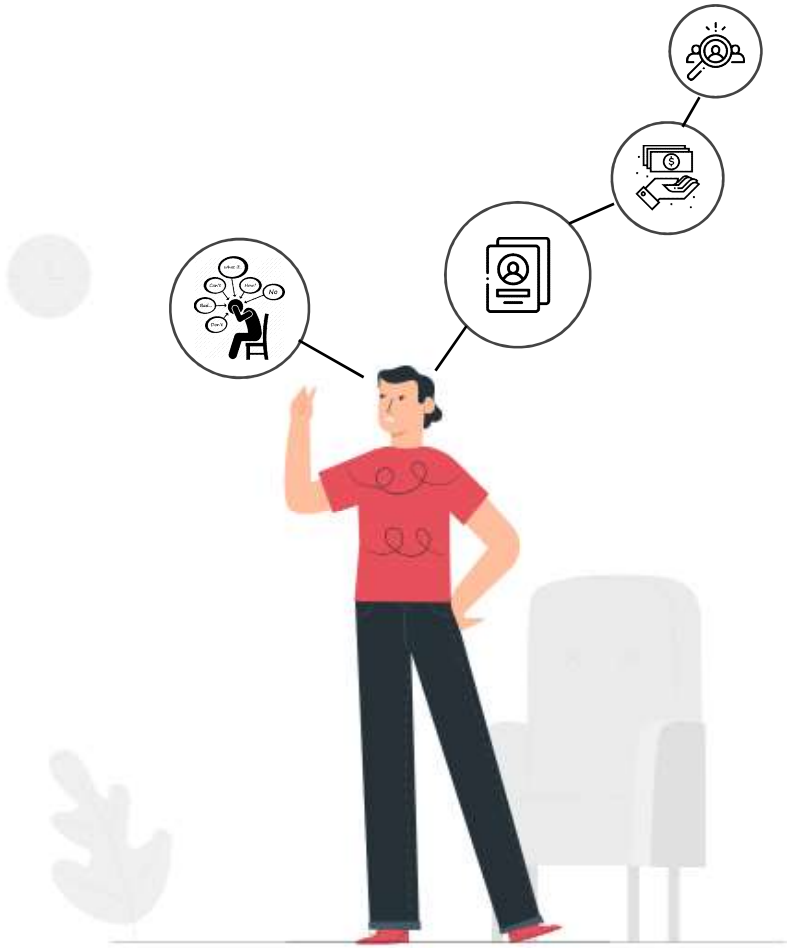
She was getting 300+ resumes for her job post.

She is confused which one she should have shortlisted.

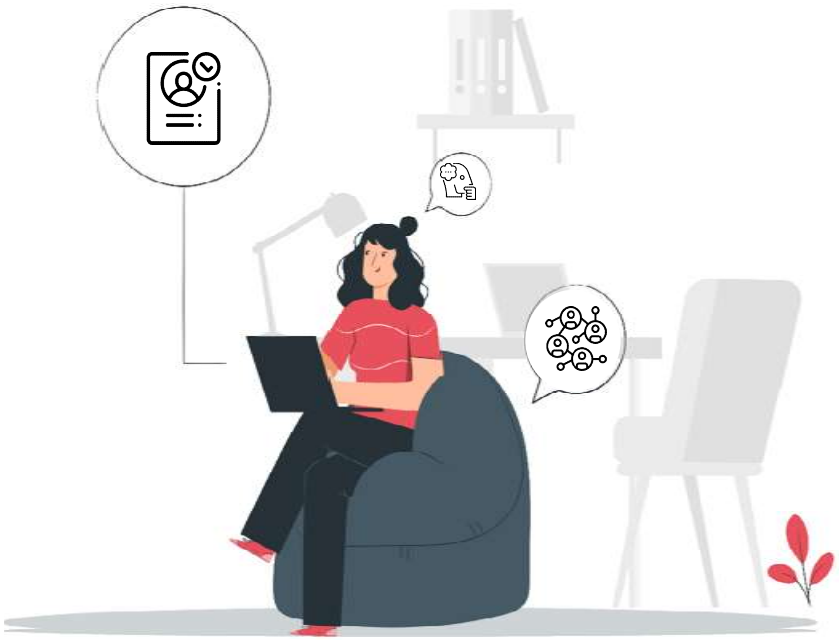
Meet Alim.

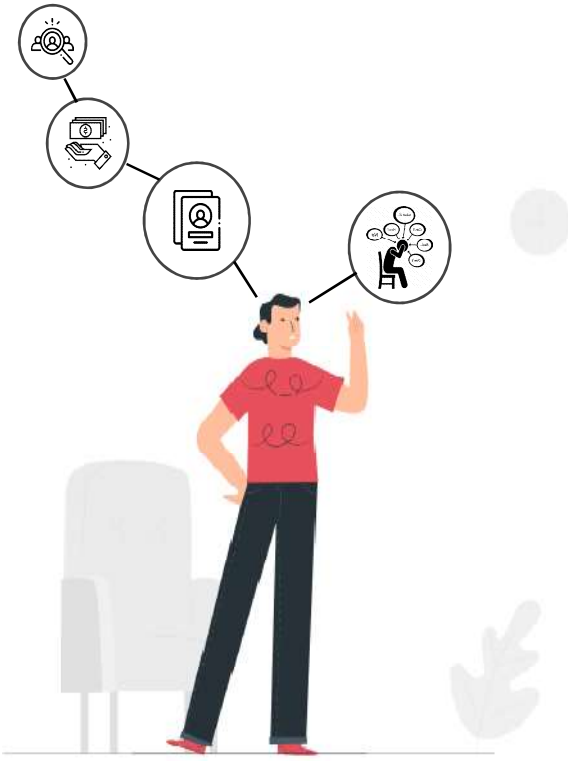
He graduated from a small town university and he grew his skill in digital marketing by his own.

Trying to get a job that is perfect for him but not getting a call after submitting his resume to 100 companies. Getting a job seems a challenge to him with no experience.



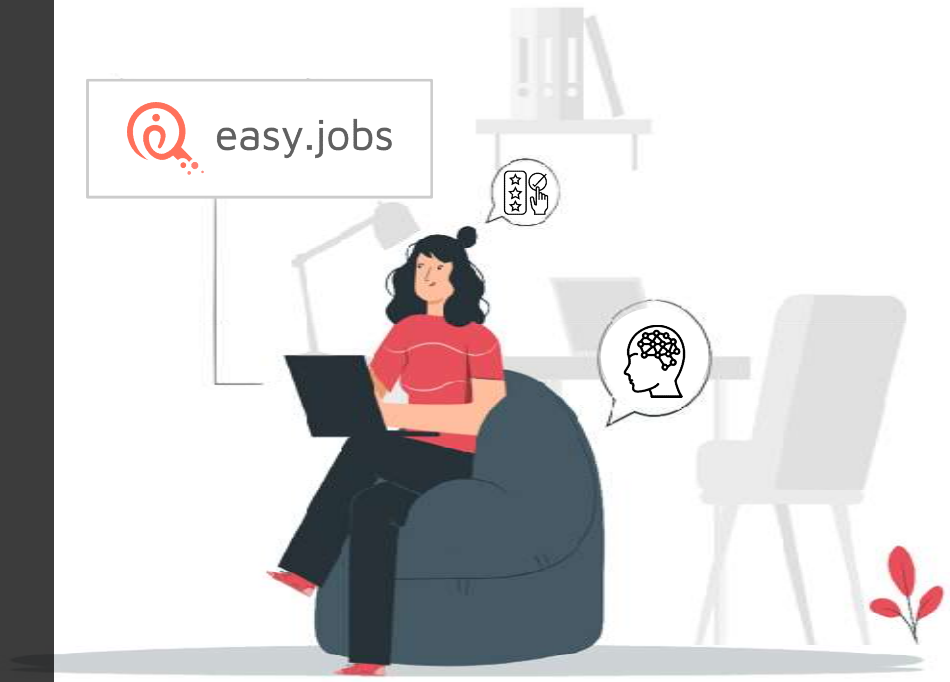
A messy and complex hiring system left Alim unemployed and stopping Dina to grow her team and business.





Then, Dina discovered easy.jobs AI based hiring software

AI based scoring system now shortlisted top candidates for her. Now she is more confident and getting interviews with only the top 3 candidates.



A simple scoring system

Dina called alim and took a 30 min interview over the phone and she is interested to hire him. Dina is very happy that she got her right candidate.

From outsider to star

Alim became the employee of the month, helped Dina to acquire 500K install for her app. Dina's app is now helping more women to be safe at the road. Dina is thinking to hire more people to take her company next level with easy.jobs.

More than **192 million** people in the world is unemployed.

THAT'S MORE THAN THE POPULATION OF VIETNAM, THAILAND AND TAIWAN COMBINED
