MYSOFT

Knowledge Effort Quality

Integrated Hospital Software Provider

COMPANY OVERVIEW

MySoft is the leading IT company at Hospital Sector in Bangladesh. Its service covers Web Development, ICT consultancy, Hardware Sales, Networking only for Hospital domain. MySoft developed country's **first** fully automated, integrated and secure HIS software. MySoft always focuses on minimizing human error, user friendliness, speed, security and latest technology. It always tries to maintain world class standard. Because its dream is to export software to abroad too. MySoft developed country's **first** and so far **only** Laboratory Automation System with Siemens. In the same time MySoft is totally a service oriented Company. MySoft always believes that service is first, business second. MySoft provides software to hospital only if it can ensure **24x7** support. Where proper support is not ensured, MySoft never provides software there. Because MySoft works in a very sensitive domain, where every single moment of a single patient is very important. Currently MySoft is working for BUET standardization and ISO certification.

Knowledge. Effort. Quality.

Radiology and Imaging with Histo-Pathology and Cyto-Pathology Reporting
 Technology: Java, JavaScript, Oracle
 Version: 1.0

Features:

- ◆ Online reporting tool with imaging.
- ◆ Accessible from any where, any device
- ◆ No installation required
- ◆ Extremely fast
- ◆ One stop service for all kinds of non lab reporting
- ◆ Suitable for research and analysis
- ◆ Customers can access/print their report even from their home.
- ◆ Latest technology is applied.
- ◆ Mobile friendly

Host Communication System for Clinical Analyzers

Technology: Java, Oracle
Version: 4.0.0.2

Features

- ◆ Both *Unidirectional* and *Bidirectional* Data Communication mode
- ◆ *Open Connectivity* with most clinical analyzers
- ◆ Test results sent to database *automatically* from the analyzers
- ◆ Integrates all attributes that the analyzer supports
- ◆ *Show/Hide specific attribute* in the report
- ◆ *Quick Data Entry* capability
- ◆ Changes of result are logged
- ◆ *Strong Security and Access Control*
- ◆ *Industry-standard report format*
- ◆ All errors are logged for smoother troubleshooting
- ◆ *Enhanced efficiency* with easy operating steps and an easy-to-learn user interface.

Unidirectional interface

The system is useful with dealing with batch Laboratory analyzers, Single Laboratory tests analyzers and other measurements devices.

Sending Answer

Bidirectional interface

The system is useful with all automated Laboratory analyzers, Single and Multi-Laboratory tests analyzers and other measurements devices.

Data Analysis

Host talk User Interface for individual analyzer.

Host talk User interface for Central host, one software for all analyzers in a Lab.

MySoft All in One LIS Communication Coverage

Endoscopic Image Processing & Reporting System
 Technology: C#.Net, Crystal Report, Oracle, Java
 Version: 3.5

Features

- ◆ *Open Connectivity* with any image capturing devices like CT, CR, USG, MRI, Dental, etc.
- ◆ *Enhanced efficiency* with easy operating steps and an easy-to-learn user interface.
- ◆ *Quick Data Entry* capability
- ◆ *Boundless image storage*
- ◆ *Strong Security and Access Control*
- ◆ *Real-life and widely-accepted report formats* (templates used for writing observations) are bundled
- ◆ All *standard Text Formatting* options available for writing observations
- ◆ *Image Editing* capability
- ◆ 2 *different standard reporting layouts* available (4 and 6 images)
- ◆ *Video & Image capturing* capability
- ◆ *CD/DVD burn* in 2 easy steps without need of any other 3rd party software

Hospital Information System (HIS)

Technology: Oracle, C#.Net, Java, PHP
Version: 4.1

Features

- ◆ *Centralized Architecture* for multiple branches/units
- ◆ Full Process flow facilitated with *Barcode* which makes processes very fast and accurate
- ◆ Voucher is tagged as '*ORIGINAL*', '*DUPLICATE*' & '*MODIFIED*'
- ◆ *Colored Work-list* for all functional points
- ◆ *Investigation Life-Cycle* (Status) for enquiry
- ◆ *Auto suggestion* for clinical steps. For example, number of samples to be collected, container by name & color based on urgency or department.
- ◆ *Abnormally High and Abnormally Low* values are indicated with colors.
- ◆ Clinical analyzers are integrated to *send result automatically* in both *Unidirectional and Bidirectional* mode leaving any human interruption or errors
- ◆ Use of *register files/papers fully eliminated*
- ◆ *Enhanced efficiency* with easy operating steps and easy-to-learn user interface.
- ◆ *Quick Data Entry* capability
- ◆ *Strong Security and Access Control*
- ◆ *Real-life and widely-accepted report formats* (templates used for writing observations) are bundled
- ◆ *Significantly less paper and ink consumption*
- ◆ Different report formats (*PDF, XLS, HTML, RTF*) with control over Preview and Print option
- ◆ Documents like Prescription, Photograph, Corporate Card, Employee Card, Discounted Voucher, etc. can easily be scanned and stored.
- ◆ *Closer monitoring* of activities
- ◆ *Instant view* of financial position of different units
